

MAVEN Release Notes
 "M Release"
 June 30, 2026

	JIRA	Title	Component/s	Release Note Description
1	MAEDSS-16042	Multi Drug Resistance Organism Cluster Events Report Automation	Antibiotic Resistance/Healthcare Acquired Infections	Automation of the MDRO Cluster Events Report used to extract MDRO and CAURIS cluster data to utilize for the MDRO dashboard
2	MAEDSS-15730	<i>Candida auris</i> Event Information Extract Automation	Antibiotic Resistance/Healthcare Acquired	events for the MDRO/CAURIS dashboard
3	MAEDSS-16041	Multi Drug Resistance Organism Event Information Extract Automation	Antibiotic Resistance/Healthcare Acquired Infections	Automation of the MDRO Event Information Extract to extract MDRO events for the MDRO/CAURIS dashboard
5	MAEDSS-15892	Add death classification status field to COVID events	Covid	Adding a field to capture case classification specifically for conditions with a separate surveillance definition for deaths. Currently only being used for COVID-associated pediatric deaths.
8	MAEDSS-14515	STD - New workflow - Syphilis cases with newly reported eCR pregnancy data for review	Electronic Case Reporting (eCR)	New workflow to identify syphilis cases with recent pregnancy data received via eCR
9	MAEDSS-15996	HIV - New workflow - HIV cases with newly reported eCR pregnancy data for review	Electronic Case Reporting (eCR)	New workflow to identify HIV cases with recent pregnancy data received via eCR
10	MAEDSS-15944	Electronic Case Reports question package modeling for incoming pregnancy data	Electronic Case Reporting (eCR)	Created new fields in the Electronic Case Reporting Question Package to capture pregnancy information as received via eCR, including: Pregnancy Status, Pregnancy Status Date, Pregnancy Estimated Date of Delivery, Pregnancy Outcome, and Pregnancy Outcome Date. Retired the old pregnancy status block that existed under EICR_VISIT_DATE. Also created new fields for select conditions (HIV, HepB, Syphilis) that capture most recent pregnancy status and an editable pregnancy status reviewed date. KEPT the EICR_PREGNANT_STATUS_LMP QID under visit date.
11	MAEDSS-15938	Modify existing report: TEST_15045_ESP-CDA Event Extract	Electronic Case Reporting (eCR)	Deleted the ESP-CDA Event Extract from MAVEN
12	MAEDSS-15993	Create a new case attribute to flag cases with recent ECR pregnancy data	Electronic Case Reporting (eCR)	The new case attribute will be assigned a value of 1 if the most recent ecr pregnancy status date is AFTER the last ecr pregnancy status reviewed date or there is no review date entered. This new case attribute will be used in three new workflows to flag syphilis, HIV and Hepatitis B events for programmatic review.
13	MAEDSS-15503	Create fields to collect Electronic Case Reporting Travel History information	Electronic Case Reporting (eCR)	Created new fields into Electronic Case Reporting Question Package to capture travel history information as received via eCR including Travel Start Date, Travel End Date, and Travel Details
25	MAEDSS-15994	New workflow - Hepatitis B cases with newly reported eCR pregnancy data for review	Epidemiology Program - Hepatitis	New workflow to identify Hepatitis B cases with recent pregnancy data received via eCR
26	MAEDSS-15859	Add QIDs for Hepatitis B events to detail date and reason for case revocation	Epidemiology Program - Hepatitis	Add date and reason for revoked in Hepatitis B events
30	MAEDSS-15966	Update restriction level to HCV_TYPE and ACUTE_HCV_STATUS	Epidemiology Program - Hepatitis	Put user restriction on Hepatitic C Type and Acute HCV Status so LBOH users cannot update the question
31	MAEDSS-15853	Update Hepatitis C event date hierarchy to set condition on when 'create date' should be used	Epidemiology Program - Hepatitis	Update logic around hepatitis C event date hierarchy so create date is assigned if all other dates are null

MAVEN Release Notes
 "M Release"
 June 30, 2026

	JIRA	Title	Component/s	Release Note Description
27	MAEDSS-15874	Update RLE and RME Primary and Secondary match status logic	Epidemiology Program - Rabies	Update logic around RME and RLE matches so that a secondary match can be overwritten by a primary match
28	MAEDSS-15862	Fix criteria for flipping Lyme MTTT tests from Suspect to Probable	Epidemiology Program - Arbovirus	Update criteria around MTTT so that tests are assigned appropriately as first and second tier and automatically assigns a probable disease status, when appropriate
14	MAEDSS-15954	Adding "Species" Field and Product Code CAMP to SEDRIC API	Epidemiology Program - Foodborne & Waterborne	Add Campylobacter to the product code list for the MAVEN-SEDRIC API. Add variable name "Species" to the variable list for the MAVEN-SEDRIC API for all product codes (SAL, SHIG, STEC, CHOL, LIST, CAMP).
15	MAEDSS-16011	Put user restriction on the "DPH - Notify inspections services:" question in FBI Complaint events	Epidemiology Program - Foodborne & Waterborne	Put user restrictions on "DPH - Notify inspections services:" so LBOH users cannot update the question.
17	MAEDSS-16008	Update FBI_ILLNESS_REMINDER_LABEL language	Epidemiology Program - Foodborne & Waterborne	Update verbiage for labels in the RISK QP for GIAR, YER, LIST, AMEB, BOT, CPREF, CALI regarding the creation of FBI complaint and tasking MAVEN group "State-DFP Notification" if unable to create it
18	MAEDSS-16009	Update Risk Question Package for HUS to match questions in STEC events	Epidemiology Program - Foodborne & Waterborne	Update Risk QP for Hemolytic Uremic Syndrome (HUS) events to match questions in Shiga toxin-Escherichia coli (STEC) events. This entails adding 6 existing questions to and retiring 1 question from HUS events.
19	MAEDSS-16096	Create METRIK Status QID	Epidemiology Program - Foodborne & Waterborne	Metrik Online/Offline Status in the FBI complaint model using the newly created Metrik status reference code to indicate whether a City/Town "opt in" in Metrik
20	MAEDSS-16016	Update instruction messages in Foodborne Illness Complaint events	Epidemiology Program - Foodborne & Waterborne	Modify verbiage for some labels and associated questions in FBI complaint events to help clarify instructions for MAVEN users in the different QPs.
21	MAEDSS-16095	Create Metrik Status Reference Code	Epidemiology Program - Foodborne & Waterborne	This reference code will populate a new QID Metrik satus in the food history section to indicate whether City/Town choose to "opt in" the new system.
22	MAEDSS-16012	Add, modify, retire questions in Giardia Clinical and Risk Question Package's	Epidemiology Program - Foodborne & Waterborne	Add, modify, retire questions in the Giardia clinical and risk question packages.
23	MAEDSS-16100	Create FbiMetrikDeleteState Case Attribute to track Metrik API "deletes"	Epidemiology Program - Foodborne & Waterborne	For the Metrik API, there is a need to be able to send "deletes" to OLRH in order to halt inspections and/or update inspectional staff on foodborne illness situations as they change. To prevent events that have already been sent though the API from being continuously up for delete, this case attribute will be populated as "1" from the API after the delete message has been sent. The API will take no action on events with FbiMetrikDeleteState = 1 as long as the Metrik algorithm is not met.

MAVEN Release Notes
 "M Release"
 June 30, 2026

	JIRA	Title	Component/s	Release Note Description
24	MAEDSS-15580	Develop MAVEN to METRIK API	Epidemiology Program - Foodborne & Waterborne	Develop API to move foodborne illness complaint information from MAVEN to METRIK.
16	MAEDSS-16010	Update the Outbreak Response Question Package in FBI Complaint events	Epidemiology Program - Foodborne & Waterborne/Food Protection Program	Update the Outbreak Response QP in FBI complaint events to improve the capture of food and environmental samples that DPH coordinates the testing of, but does not directly test.
32	MAEDSS-16049	Update Metrik Last Sent date to be date/time string field	Epidemiology Program - Foodborne & Waterborne/Food Protection Program	Update Metrik last sent date to be a string field to capture date and time (including seconds) to enable same day resends.
33	MAEDSS-16050	Investigate unique ID for Metrik Ill person block and suspect food/drink block	Epidemiology Program - Foodborne & Waterborne/Food Protection Program	To enable updates of repeatable a) ill person block and b) suspect food/drink block as OLRH wants in Metrik salesforce environment, we need a unique ID that 1) does not change with data associated with block and 2) is unique enough that we do not run into duplicate IDs.
4	MAEDSS-15960	Updates to Respiratory and Flu Clusters	Epidemiology Program - Immunization	Adding a field so facilities can report if they want epi assistance with their cluster, and a field to mark if a cluster meets ILI definition.
59	MAEDSS-15956	Modeling for Measles for Message Mapping Guide (MMG)	Epidemiology Program - Immunization	Adding numerous fields to Measles for alignment with CDC MMG data priorities and to capture new community transmission and epi-link criteria.
60	MAEDSS-15958	Update HFLU Vaccine Message	Epidemiology Program - Immunization	Changes the wording of a message-only field related to H Flu vaccination
61	MAEDSS-15957	Modeling for Mumps	Epidemiology Program - Immunization	Additional Mumps symptom onset date fields and fields related to import status
62	MAEDSS-15871	Update Perinatal Hepatitis B contact investigation fields	Epidemiology Program - Immunization - Perinatal Hepatis B	Modify language around contact and method of communication fields
63	MAEDSS-15975	Update age range for header in HepB clinical Question Package	Epidemiology Program - Immunization - Perinatal Hepatis B	Update headers from '14-44' to '14-50'
6	MAEDSS-15180	Modifications to Sequencing Question Package : Species variable for Enteric Diseases	Epidemiology Program - Immunization & Next Genomic Sequencing	Add new variable called "Species" to the Sequencing Information question package for SAL, STEC, CAMP, SHIG, LIST, CHOL Also include CAMP for QIDs NGS_INPUT_DATE, NGS_CLUSTER_FIRSTDATE, and NGS_CLUSTER_LASTDATE
29	MAEDSS-15852	Remove dengue-like illness from Dengue Type	Epidemiology Program - Zoonotics	Retire dengue-like illness as it is no longer a dengue type starting 1/1/26
34	MAEDSS-16091	Update Clinician Lookup link in MAVEN Investigation Section	Global	Updating link for clinician look up (former link was broken)
35	MAEDSS-16002	Update Clinician Lookup link in MAVEN (Model Field)	Global	Updating link for clinician look up (former link was broken)
36	MAEDSS-15955	Retire EMPLOYMENT_MESSAGE QID in EPI/IMM model	Global	This message had been created in error and was never visible. It is being retired.
37	MAEDSS-16054	Add Middle East and North Africa (MENA) and MULTIRACE values to NMI extract	Global	Addition of race values in MAVEN.

MAVEN Release Notes
"M Release"
June 30, 2026

	JIRA	Title	Component/s	Release Note Description
7	MAEDSS-12356	Create pediatric variables for HIV cases & other changes	HIV Program	Add specific variables from the pediatric CRF so that it can be collected in MAVEN.
38	MAEDSS-16004	HIV Workflow - Update the 'HIV - Suspect Acute HIV'	HIV Program	Update the logic to include additional SNOMEDs and the description of this existing workflow.
39	MAEDSS-16058	Create reference code group for in HIV out of care linelist report	HIV Program	Create reference code group for Lab results included HIV out of care linelist reports (MAEDSS-15977 and MAEDSS-15978)
40	MAEDSS-16105	Case attribute confirmatoryLabSuspectToConfirm is not getting cleared appropriately.	HIV Program	Ensure the confirmatoryLabSuspectToConfirm case attribute is cleared when L/S combinations are removed.
41	MAEDSS-15705	Update description of the 'HIV - HASP Review Needed' WF	HIV Program	Update the existing workflow description to make it more accurate and reflective of the workflow's purpose.
42	MAEDSS-15899	Update the HIV - Pediatric Cases workflow	HIV Program	Update the logic to exclude events containing only CD4 LOINC codes created before January 2023, and to include all events with missing CRFs.
43	MAEDSS-15695	Update Contact Cases to Confirmed workflow	HIV Program	Update the existing logic to use the hiv.confirmatory case attribute. Revise the workflow description to ensure it accurately reflects the purpose of the workflow.
44	MAEDSS-15652	Update Suspect HIV Events to Confirm Workflow	HIV Program	Update the description and the criteria of this workflow in order to use the existing hiv.confirmatory case attribute.
45	MAEDSS-15798	HIV/AIDS Needs Complete CRF Workflow	HIV Program	Update the logic to include pediatric CRF source in the workflow.
46	MAEDSS-15822	Update Cluster Report	HIV Program	Update cluster report to include additional variables from the HIV CRF QP.
47	MAEDSS-15684	Update the HIV - CRF received, need confirmatory lab workflow	HIV Program	Update the existing logic and revise the workflow description to ensure it accurately reflects the purpose of the workflow.
48	MAEDSS-15826	Update HIV - Suspect AIDS progressors	HIV Program	Update the existing logic and revise the workflow description to ensure it accurately reflects the purpose of the workflow.
49	MAEDSS-15710	Update HIV - Missing residence and facility at HIV diagnosis workflow	HIV Program	Update the logic to include additional QIDs from the Additional CRF QP.
50	MAEDSS-15977	Update HIV- Out of Care Linelist' report	HIV Program	Update the logic behind the HIV Out-of-Care Line List report to ensure that it accurately captures the purpose of the report and meets the needs of the program.
51	MAEDSS-16119	Create HIV.MISSING.DIAGNOSIS.LOCATION Case Attribute	HIV Program	JIRA linked MAEDSS-15710, to ensure all cases enter the 'HIV - Missing residence and facility at HIV diagnosis' WF, a new case attribute was needed to read the residence/facility iterations accurately.
52	MAEDSS-16104	AIDS Progressor Variable - Update Lab logic	HIV Program	Update this logic so that the Potential AIDS Progressor QID in the Admin QP is only updated if the CD4 results are strictly <200 and <14%.
53	MAEDSS-15707	Update workflow: HIV - Missing required demographic information	HIV Program	Update the description and the criteria of this workflow.

MAVEN Release Notes
"M Release"
June 30, 2026

	JIRA	Title	Component/s	Release Note Description
56	MAEDSS-15706	Update HIV- Missing Race/Ethnicity workflow	HIV Program	Update the existing logic of this workflow.
58	MAEDSS-15978	Update HIV - Out of Care line list 13 months since last CD4 or VL report	HIV Program	Update the logic behind the HIV Out-of-Care Line List 13 months report to ensure that it accurately captures the purpose of the report and meets the needs of the program.
55	MAEDSS-15997	Reprocess STD cases to update "Investigating Agency" QID	HIV Program/Sexual Transmitted Disease Program	Reprocess the STD cases to update the INVESTIGATING_AGENCY field. The logic of this variable has been updated to reflect the state at the time the event is created (MAEDSS-14516).
57	MAEDSS-15998	Add Case Classification to notifications section for STD/HIV events	HIV Program/Sexual Transmitted Disease Program	Add the "Case Classification" section to the STD model. This section should include the following information: "Age at time of event:" and "Age unit".
66	MAEDSS-15717	Create Rhapsody Lookup Tables for MPV MMG	NNDSS Modernization Initiative (NMI)	Addition of entries for Rhapsody lookup tables for MPV message mapping guide.
68	MAEDSS-15431	Create extract for MPV MMG	NNDSS Modernization Initiative (NMI)	Creation of MPV message mapping guide code as part of NMI HL7 message transmission to CDC.
70	MAEDSS-16079	Rhapsody development for MPV MMG	NNDSS Modernization Initiative (NMI)	Rhapsody mapper work for developers.
71	MAEDSS-16083	Parse out unit field	NNDSS Modernization Initiative (NMI)	Parse out unit field and add it to designated OBX segment.
72	MAEDSS-16013	Add new option for "eligibility document type"	Refugee Immigrant Health Program	Update ELIG_DOCS_REVIEWED_TYPE to include "RISIS" option. For this "RISIS" option, there will be a new free text field to record the RISIS ID.
73	MAEDSS-15985	Modify Arrival Line List Report	Refugee Immigrant Health Program	Existing Refugee report is modified to add new variables/remove old variables
74	MAEDSS-16015	RIHP/RIHP_FAMILY - Update RIHP & RIHP_FAMILY models to better collect CHW work	Refugee Immigrant Health Program	New Community Health Worker variable will copy from Refugee Family model to Refugee model
75	MAEDSS-15988	Modify DGP - CHW caseload new arrivals (open) report	Refugee Immigrant Health Program	Existing Refugee report is modified to add new variables/remove old variables
76	MAEDSS-15986	Modify DGP - CHW caseload new arrivals (assigned) report	Refugee Immigrant Health Program	Existing Refugee report is modified to add new variables/remove old variables
77	MAEDSS-15987	Modify DGP - CHW caseload new arrivals (closed) report	Refugee Immigrant Health Program	Existing Refugee report is modified to add new variables/remove old variables
54	MAEDSS-16101	Update logic of INVESTIGATING_AGENCY QID	Sexual Transmitted Disease Program	Update the INVESTIGATING_AGENCY QID in the Admin QP to capture the State QID from the Demographic QP rather than the contact point state in the Participant tab.
64	MAEDSS-15887	Update Interview Pending WF	Sexual Transmitted Disease Program	Update the logic of this existing workflow to ensure that it excludes all events created before 1/1/2025.
65	MAEDSS-15886	Update Clinical review required workflow	Sexual Transmitted Disease Program	Update the logic of this existing workflow to ensure that it excludes all chlamydia and gonorrhoea events, all neonatal events over one year old, and all cases created before 1/1/2025.
67	MAEDSS-15888	Update Open Field Investigation workflow	Sexual Transmitted Disease Program	Update the logic of this existing workflow to exclude Gonorrhoea/Chlamydia events and cases with an event date earlier than 1/1/2025.

MAVEN Release Notes
 "M Release"
 June 30, 2026

	JIRA	Title	Component/s	Release Note Description
78	MAEDSS-14516	Clinical Question Package , Admin Question Package , Field Investigation Wizard updates	Sexual Transmitted Disease Program	Add questions/ answer options related to DoxyPEP usage, SXT referral services, pregnancy information, and interstate follow-up in the STD model. Retire a QID from the STD model going forward (to be replaced by a new question block in the requirements).
79	MAEDSS-15999	Create a 'Reactor Desk' wizard	Sexual Transmitted Disease Program	Create a "Reactor Desk" wizard that compiles all the pregnancy variables listed in the various question packages (eCR, ESP, ITLS, Field Investigation, and Clinical QPs). This wizard will help summarize the necessary information for Reactor Desk follow-up.
80	MAEDSS-15889	Update "Syphilis cases with Neurologic Involvement" workflow	Sexual Transmitted Disease Program	Update the logic of this existing workflow to ensure that it excludes all events created before 1/1/2025.
69	MAEDSS-15991	Update NMI extract for TB	Tuberculosis	Changes made to TB NMI extract to include one additional data element and update two existing variables.
81	MAEDSS-15984	Update RVCT Wizard	Tuberculosis	Adding Illness Onset Date and child questions for Occupation variable to the RVCT wizard. Removing "Has patient lived outside of the US for more than 2 months uninterrupted" from RVCT wizard.
82	MAEDSS-16026	Create new Illness Onset Date variable in TB model	Tuberculosis	Creating new "Illness Onset Date" variable to TB model to distinguish from Symptom Onset Date (for CDC reporting purposes)
83	MAEDSS-15983	Update TB exposure answer options	Tuberculosis	Retiring "Has patient lived outside of the US for more than 2 months uninterrupted" from TB model. Removing MAVEN logic from "Did patient live uninterrupted outside of the US for more than 2 months" so that it appears in Demographic QP, regardless of patient age.
