This month’s ePostcard will highlight the **LBOH Notification but no follow up needed workflow** for Local Board of Health (LBOH) in MAVEN.

This workflow includes the diseases listed below. Other than receiving a notification, no further follow up on these events is generally required by the LBOH. You can use the bulk action feature to update Step 1 (LBOH Notification) to Yes. If you want to continue to investigate and follow up on these events/cases, please feel free to do so in MAVEN.

**Diseases that flow into the workflow:**
- Encephalitis
- Enterovirus
- Group B streptococcus infection
- Hepatitis B cases not considered to be suspect acute
- Hepatitis C cases not considered to be suspect acute
- Hepatitis D
- Influenza
- Invasive bacterial infection (other)
- Lyme disease
- Psittacosis
- Refugee
- Refugee Family
- Rickettsial pox
- Streptococcus pneumonia infections among those 18 years and older
- Typhus fever
- Varicella
- Viral meningitis

You will not see these diseases in your **LBOH Notification for Routine Disease workflow** or your **LBOH Case Report Forms (CRF) are pending workflow**. They will appear only in your **LBOH Notification but no follow-up required workflow**. If you choose to begin an investigation, you may complete it or, in the Administrative Question...
